HISTOGRAM: AFD-16.7 SD-2.8 CV-16.6 %>30-0.4%

HAYLS BREW is a strikingly strong, elegant female with beautiful bone structure and fabulous fiber quality which is exhibited by her fine bright fleece, abundant coverage and density. HAYLS greatness is a testament to her fully loaded genetic history. She is created from many of the great alpacas that have accelerated our alpaca industry to what it is today. HAYLS genetics are backed with the superb Snowmass line, outstanding NGG Lional, Captian Nemo and Sweet William, just to name a few. Hayls is guaranteed add amazing genetics and quality to your breeding program.

HAYLS's sire, Oliopus Brew is the perfect genetic combination from two great alpacas. His Sire, Snowmass Conopa, speaks for himself with his offspring's continual performance in the showing. Conopa's consistency produces outstanding alpacas with incredible fineness, density and character. Oliopus's Dam, Olia Brew is one of the pillars of the Brewster Alpacas breeding program. As a daughter of the great Preuvian sire Captain Nemo and granddaughter of NGG Lional on her dam's side, she has proven to pass on their outstanding confirmation and fibre qualities to produce exceptional crias year after year. Oliopus carries forward the genetic legacy from both sides: solid conformation, coverage, luster, and density.

HAYLS dam, Halle Alyst is the daughter of Snowmass Matrix Reloaded. Reloaded streams from a solid line of Snowmass. Halle continues the Snowmass legacy with stunningly strong confirmation, and the ultimate density. You can see the genetics as Halle has rubber stamped her daughter ensuring the Snowmass prominence lives on with density and uniform coverage.

HAYLS's density and fleece architecture would make her ancestors proud! She brings the force of her past to the future of her progeny.
